## II. Basis for the preparation of financial statements

### 2.1. Basis for preparation

These interim condensed consolidated financial statements have been prepared in accordance with the historical cost convention, except for financial assets carried at fair value through profit or loss or through other comprehensive income, financial assets carried at amortized cost, as well as financial liabilities carried at fair value through profit or loss.

These interim condensed consolidated financial statements do not include all information and disclosures required for annual consolidated financial statements, and therefore they should be read together with the Group's consolidated financial statements for the year ended 31 December 2022 which were published on 22 February 2023.

These interim condensed consolidated financial statements have been prepared on a going-concern basis, assuming the Group will continue its business activities over a period not shorter than 12 months from 30 June 2023. Till the date of preparing these interim condensed consolidated financial statements, we have not observed any circumstances that would threaten the Group's ability to continue as a going concern.

#### Economic and political situation on the territory of Ukraine

On 24 February 2022, the Russian invasion of Ukraine caused a radical change in the geopolitical situation of the entire region in which the Parent Company and other companies of our Group are located.

ASEE Group does not conduct any significant business operations in Russia, Belarus or in Ukraine. In the first half of 2023, the Group's total sales to the above-mentioned countries represented just 0.01% of our total revenues, as compared to 0.1% in the whole year 2022. The Group does not hold any cash at bank accounts in Russia. This situation has no significant direct impact on these consolidated financial statements.

The Group continues to analyze geopolitical developments and their impact on the Group's financial position and financial performance in the future.

At the moment the situation is dynamic and therefore it is difficult to assess the long-term economic effects for our region and impact on the overall macroeconomic situation, which indirectly affects the Group's financial results.

#### Hyperinflation

In 2022, Turkey was recognized as a country with a hyperinflationary economy. The Group consolidates the financial data of several subsidiaries operating in Turkey, including ASEE Turkey, Payten Turkey, Paratika, Mobven, and Smarttek, whose functional currency is that of a hyperinflationary economy. Therefore, these interim condensed consolidated financial statements contain the financial data of our subsidiaries operating in Turkey adjusted for the rate of inflation so that they reflected changes in the appropriate price index. The effects of hyperinflation adjustments have been described in explanatory note 2.10. to these interim condensed consolidated financial statements.

### 2.2. Compliance statement

These interim condensed consolidated financial statements have been prepared in conformity with the requirements set forth in the International Accounting Standard 34 'Interim Financial Reporting' as endorsed by the European Union (IAS 34).

The scope of these interim condensed consolidated financial statements is in accordance with the Regulation of the Minister of Finance of 29 March 2018 regarding current and periodic information to be published by issuers of securities and conditions for recognizing as equivalent the information required by laws of non-EU member states (consolidated text: Journal of Laws of 2018, item 757) (the "Regulation"), and covers the interim reporting period from 1 January to 30 June 2023 and the comparable period from 1 January to 30 June 2022 in case of the statement of profit and loss, statement of comprehensive income, statement of changes in equity and the statement of cash flows, as well as the financial position data as at 30 June 2023 and the comparable data as at 31 December 2022 in case of the statement of financial position.

---

The cumulative data presented for the period of 6 months ended 30 June 2023 as well as for the comparable period have been reviewed by a certified auditor. Whereas, the quarterly data disclosed for the period from 1 April to 30 June 2023 and for the corresponding period of 2022 have not been subject to such a review. These data have been calculated as the difference between the semi-annual cumulative data and the data presented in the quarterly condensed consolidated financial statements of ASEE Group for the interim period ended 31 March 2023 which were published on 26 April 2023.

Some of the Group companies maintain their accounting books in accordance with the accounting policies set forth in their respective local regulations. The interim condensed consolidated financial statements include adjustments not disclosed in the accounting books of the Group's entities which were introduced to adjust the financial statements of those entities to IFRS.

### **2.3. Functional currency, presentation currency and hyperinflation**

The presentation currency of these interim condensed consolidated financial statements is the Polish zloty (PLN) and all figures are presented in thousands of PLN (PLN'000), unless stated otherwise. Any inaccuracies in totals, amounting to PLN 1 thousand, are due to the adopted rounding of numbers.

The functional currency applied by the Parent Company and, at the same time, the presentation currency used in these interim condensed consolidated financial statements is the Polish zloty (PLN). Functional currencies applied by our subsidiaries consolidated in these financial statements are the currencies of primary business environments in which they operate. For consolidation purposes, financial statements of our foreign subsidiaries are translated into PLN using the respective currency exchange rates as quoted by the National Bank of Poland at the end of the reporting period in case of the statement of financial position, or using the arithmetic average of such exchange rates as published by the National Bank of Poland and effective on the last day of each month during the reporting period in case of the statement of comprehensive income as well as the statement of cash flows. The effects of such conversion are recognized in equity as 'Exchange differences on translation of foreign operations'.

As regards our subsidiaries operating in a hyperinflationary economy, individual items of the statement of comprehensive income are translated into PLN using the respective currency exchange rates as determined by the National Bank of Poland at the end of the reporting period. The difference resulting from the translation of the statement of comprehensive income at the exchange rate effective on the reporting date, instead of using the average exchange rate for the reporting period, is disclosed in the line 'Exchange differences on translation of foreign operations'.

### **2.4. Professional judgement and estimates**

Preparation of consolidated financial statements in accordance with IFRS requires making estimates and assumptions which have an impact on the data disclosed in such financial statements. Although the adopted assumptions and estimates have been based on the Group's management best knowledge on the current activities and occurrences, the actual results may differ from those anticipated.

In the period of 6 months ended 30 June 2023, our approach to making estimates was not subject to any substantial modification in relation to the principles described in the consolidated financial statements for the year ended 31 December 2022.

### **2.5. Accounting policies applied**

Significant accounting policies adopted by the Parent Company have been described in its consolidated financial statements for the year ended 31 December 2022 which were published on 22 February 2023.

Significant accounting policies applied by the Group in these interim condensed consolidated financial statements are consistent with those explained in the Group's annual consolidated financial statements for the year 2022, except for the adoption of new or amended standards and interpretations effective for annual periods beginning on or after 1 January 2023. New standards or amendments effective from 1 January 2023:

- IFRS 17 'Insurance Contracts' and amendments to IFRS 17;
- Amendments to IAS 1 'Presentation of Financial Statements: Disclosure of Accounting Policies';

- Amendments to IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates';
- Amendments to IAS 12 'Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction'.

The amended standards and interpretations that were first applied in 2023 had no significant impact of the interim condensed consolidated financial statements of the Group.

## **2.6. New standards and interpretations published but not in force yet**

The following standards and interpretations were issued by the International Accounting Standards Board (IASB) and International Financial Reporting Interpretations Committee (IFRIC), but have not yet come into force:

- Amendments to IAS 7 'Statement of Cash Flows' and IFRS 7 'Financial Instruments: Disclosures: Supplier Finance Arrangements' (issued on 25 May 2023) – not yet endorsed by the EU till the date of approval of these financial statements – effective for annual periods beginning on or after 1 January 2024;
- Amendments to IAS 12 'Income Taxes: International Tax Reform – Pillar Two Model Rules' (issued on 23 May 2023) – not yet endorsed by the EU till the date of approval of these financial statements – effective for annual periods beginning on or after 1 January 2024;
- Amendments to IFRS 16 'Leases – Lease Liability in a Sale and Leaseback' (issued on 22 September 2022) – not yet endorsed by the EU till the date of approval of these financial statements – effective for annual periods beginning on or after 1 January 2024;
- Amendments to IAS 1 'Presentation of Financial Statements': 'Classification of Liabilities as Current or Non-current' (issued on 23 January 2020), 'Classification of Liabilities as Current or Non-current – Deferral of Effective Date' (issued on 15 July 2020), 'Non-current Liabilities with Covenants' (issued on 31 October 2022) – not yet endorsed by the EU till the date of approval of these financial statements – effective for annual periods beginning on or after 1 January 2024.

The specified effective dates have been set forth in the standards published by the International Accounting Standards Board. The actual dates of adopting these standards in the European Union may differ from those set forth in the standards and they shall be announced once they are approved for application by the European Union.

The Group did not decide on early adoption of any standard, interpretation or amendment which has been published but has not yet become effective.

The Group is currently conducting an analysis of how the above-mentioned amendments are going to impact its financial statements.

## **2.7. Changes in the presentation methods applied**

During the reporting period, the methods of presentation were not subject to any change.

## **2.8. Correction of errors**

In the reporting period, no events occurred that would require making corrections of any misstatements.

## **2.9. Changes in the comparable data**

The Group has changed the comparable data disclosed as at 30 June 2022 due to changes in the values of assets acquired that were recognized in the purchase price allocation of our subsidiary companies: Web Studio, BS Telecom, and Bithat Solutions s.r.l., as well as the comparable data disclosed as at 31 December 2022 due to the completion of the purchase price allocation of Bithat Solutions s.r.l.

## 2.10. Accounting effects of Turkey's status as a hyperinflationary economy

The Group has subsidiaries operating in a hyperinflationary economy to which IAS 29 'Financial Reporting in Hyperinflationary Economies' is applied. The Group has identified hyperinflation in Turkey on the basis of qualitative and quantitative factors existing in this country, and in particular because the three-year cumulative inflation rate exceeded 100% in April 2022.

In accordance with IAS 29, the financial data of our Turkey-based subsidiaries have been restated to reflect the purchasing power at the end of the reporting period, based on the consumer price index (CPI) as published by the Turkish Statistical Institute. Accordingly, non-monetary items in the statement of financial position as well as the statement of profit and loss have been restated to reflect the purchasing power at the reporting date. Monetary items such as receivables, liabilities, bank debt, etc. already reflect the purchasing power at the reporting date because these items are composed of balances, amounts of receivables or payables in respective monetary units. IAS 29, in conjunction with IAS 21 on foreign currency translation, also requires all transactions carried out in a hyperinflationary currency, i.e. Turkish lira (TRY), to be translated into the Group's presentation currency, i.e. Polish zloty (PLN), using the exchange rate effective on the reporting date. Therefore, in the current reporting period all transactions conducted in Turkey were converted into PLN using the exchange rate effective on 30 June 2023; whereas, all transactions conducted in Turkey in the period of 6 months ended 30 June 2022 were converted into PLN using the exchange rate of 30 June 2022, although the Group usually translates transactions in the statement of profit and loss at the average exchange rate for the given reporting period.

### Basis of restatements due to hyperinflation

- Price index:

Hyperinflation restatements of the financial data of our subsidiaries operating in Turkey have been based on officially available data on changes in the consumer price index (CPI) as published by the Turkish Statistical Institute. According to this index, the inflation rate for the period of 6 months ended 30 June 2023 reached 20%.

The rates of inflation for particular reporting periods are presented in the table below:

Inflation rate for particular periods	
June 2023 – December 2022	20%
June 2023 – June 2022	38%
December 2022 – December 2021	64%
December 2021 – December 2020	36%
Three-year cumulative inflation rate	
June 2023 – June 2020	190%
December 2022 – December 2019	156%

- Currency exchange rate:

All financial data of our subsidiary operations in Turkey, both in the statement of financial position and the statement of profit and loss are translated into the Group's presentation currency (PLN) using the TRY/PLN exchange rate effective on the reporting date, which is contrary to the Group's usual practice of translating the statement of profit and loss at the average exchange rate for the reporting period. As at 30 June 2023, this exchange rate was: TRY 1 = PLN 0.1575.

**Assumptions for the approach and timing of hyperinflation restatements:**

- Hyperinflation restatements in the local currency
  - The Group has analyzed items of the statement of financial position of its subsidiaries in Turkey and divided them into monetary and non-monetary assets/liabilities. Monetary items have not been restated because they are already expressed in terms of the monetary unit current at the end of the reporting period.

- Significant non-monetary items existing in our Turkish subsidiaries include: goodwill arising from the acquisition of these companies, property, plant and equipment, intangible assets, right-of-use asset, prepayments, and liabilities from contracts with customers. Right-of-use assets have not been additionally revalued because they are periodically indexed by the inflation rate. Other non-monetary items have been restated to reflect the effects of inflation based on changes in the price index. Effects of changes in the price index in the period from initial recognition till 31 December 2022 have been recognized in the financial data for the year 2022. Whereas, effects of changes in the price index since 1 January till 30 June 2023 have been recognized in the financial statements for the current reporting period.

The restatements were made as at the date of initial recognition of non-monetary items, but not earlier than as at the date of acquisition of subsidiaries by the Group, because it is assumed that non-monetary items were then translated and recognized in the consolidated financial statements at fair value, reflecting the purchasing power as at the acquisition date. The restatement significantly increased the value of goodwill, property, plant and equipment, and intangible assets. Such restatement also resulted in higher costs in the statement of profit and loss in the form of higher depreciation and amortization charges due to the restated gross values of property, plant and equipment and intangible assets, higher expenses and income from the accounting for restated amounts of accruals and contract liabilities.

- Due to the revaluation of non-monetary assets and liabilities, deferred tax calculated as the difference between the tax value and the book value was also revalued.
- All transactions included in the statement of profit and loss for the period of 6 months ended 30 June 2023 have been restated to reflect changes in the price index from the month when recognized till 30 June, except for depreciation charges on property, plant and equipment and amortization charges on intangible assets that have been remeasured based on the adjusted gross value of these assets, as well as expenses and income arising from the accounting for restated amounts of accruals and contract liabilities. The remeasurement of depreciation and amortization charges has been based on the normal periods of useful life of relevant assets. The restatement of the statement of profit and loss for the inflation rate resulted in an increase in the value of individual items presented in the local currency due to changes in the price index from the date of their recognition till 30 June 2023.
- In correspondence to the restatement of the statement of profit and loss and the statement of financial position for the inflation rate in the current reporting period, the Group has recognized a gain/loss on the net monetary position, disclosed financial income/expenses in the statement of profit and loss. In correspondence to the revaluation of items in the statement of financial position for the inflation rate from the date of their initial recognition till the end of 2021, the Group has recognized exchange differences on translation of foreign operations disclosed separately in other comprehensive income for 2022 and in equity.
- Translation of financial data into the Group's presentation currency
  - Once the financial statements of our subsidiaries operating in Turkey were restated for the effects of inflation in the local currency, they have been translated into PLN which involved translating the

statement of financial position and all items of the statement of profit and loss for the reporting period, using the TRY/PLN exchange rate effective on the reporting date. As at 30 June 2023, this exchange rate was: TRY 1 = PLN 0.1575. Translation of the statement of financial position has remained unchanged compared to the Group's usual practice, while the new principle of translating the statement of profit and loss has had a significant impact on its individual items. The effect of translating the statement of comprehensive income using the closing exchange rate of the reporting period has been recognized in correspondence in exchange differences on translation of foreign operations.

- Time of recognition

- IAS 29 has been implemented by the Group since 1 January 2022 and the first hyperinflation restatements were made in the interim consolidated financial statements for the period of 6 months ended 30 June 2022. Because the three-year cumulative inflation rate exceeded 100% in April 2022, the already published data for the first quarter of 2022 were not subject to hyperinflation adjustments.

The impact of adopting IAS 29 on the consolidated financial statements for 2023 is summarized below:

## IV. Information on operating segments

According to IFRS 8, an operating segment is a separable component of the Group's business for which separate financial information is available and regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance.

Asseco South Eastern Europe Group has identified the following reportable segments reflecting the structure of its business operations:

- Banking Solutions,
- Payment Solutions,
- Dedicated Solutions.

These reportable segments correspond to the Group's operating segments.

The **Banking Solutions** portfolio includes fully-fledged solutions and products necessary to run a bank such as omnichannel solutions designed to distribute banking products and services, solutions allowing to improve communication with the customer, integrated core banking systems, authentication security solutions, reporting systems for regulatory compliance and managerial information, as well as risk management and anti-fraud systems. The segment also offers its clients 24x7 online services and consultancy in the areas of mobile and electronic banking and digital transformation.

The **Payment Solutions** segment provides complete payment industry solutions supporting online and offline payments, which are offered by the Payten Group for both financial and non-financial institutions. These solutions are intended for e-Commerce (online payment gateways, support for alternative payment methods – cryptocurrencies, QR codes, solutions enabling tokenization of cards, subscription payments), mobile payments (mPOS, vPOS, SoftPOS), payment card processing, as well as services related to ATMs and EFT POS terminals. The Group delivers software and services as well as ATMs and payment terminals, including outsourcing and equipment, providing the highest level of expertise, maintenance and support through the entire portfolio. This segment also operates an independent network of ATMs under the brand name of MoneyGet. In addition, the Group runs a network of independent EFT POS terminals at points of sale – IPD service under the Monri brand that enables merchants to replace two or more payment terminals at the point of sale with a single device connected directly to multiple acquirers (card issuers). Moreover, the segment offers complementary solutions for creating online and mobile stores and marketplace platforms, as well as cash register management and sales support systems (ECR) for retailers.

The **Dedicated Solutions** segment provides services to the sectors of utilities and telecommunications, public sector (including road infrastructure), government as well as to the banking and finance sector within the following business lines: BPM business process management, customer service and sales support platform, data registers, smart city, AI & Machine Learning, e-Tax, border control, authentication, dedicated solutions, BI and ERP. The Group focuses on selling its proprietary solutions but also offers a full range of integration services for solutions from leading global vendors.

The Group's financing activities as well as income taxes are monitored at the whole group level and therefore they are not allocated to individual operating segments. The Management also does not analyze assets and liabilities or cash flows in a breakdown by segments. The table below presents the key financial information reviewed by the chief operating decision maker in the Company.

Revenues from one of our customers exceeded 10% of total sales generated by the Group in the period of 6 months ended 30 June 2023, accounting for 10.4% of total sales. It is a customer of the Payment Solutions and Dedicated Solutions segments and the increase in revenues from that customer was due to large deliveries of payment terminals carried in the first half of 2023 in relation to the comparable period last year.

Gain/loss on revaluation of conditional payments in transactions to obtain control resulted from changes in the estimates of deferred contingent liabilities arising from the acquisition of controlling interests in subsidiaries.

Gain/loss on revaluation of liabilities from the acquisition of non-controlling interests (put options) results from changes in the estimates that are the basis for the calculation of a liability arising from put options if, under the purchase agreement, benefits incidental to ownership of such puttable equity instruments shall be transferred to the Parent Company (present ownership).

## 5.5. Corporate income tax

The main charges on pre-tax profit resulting from corporate income tax (current and deferred portions):

	3 months ended 30 June 2023 PLN'000	6 months ended 30 June 2023 PLN'000	3 months ended 30 June 2022 (restated) PLN'000	6 months ended 30 June 2022 (restated) PLN'000
Current corporate income tax expense as disclosed in the statement of profit and loss, of which:	(12,608)	(24,617)	(10,485)	(19,423)
<i>Current portion of income tax</i>	(14,037)	(26,159)	(12,103)	(21,048)
<i>Adjustments to prior years' income tax</i>	1,429	1,542	1,618	1,625
Deferred income tax	2,525	3,949	1,949	1,217
<b>Income tax expense as disclosed in the statement of profit and loss</b>	<b>(10,083)</b>	<b>(20,668)</b>	<b>(8,536)</b>	<b>(18,206)</b>

During the period of 6 months ended 30 June 2023, our effective tax rate equalled 17.7% as compared to 14.7% in the comparable period last year. The effective tax rate increased mainly due to the lower amount of non-taxable gain on the net monetary position arising from hyperinflation restatements than a year ago, one-time earthquake income tax charged in Turkey, as well as higher income tax on dividends received by ASEE S.A./Payten Holding S.A. from their subsidiaries located outside of the European Union. Income from operating activities was taxed at a similar level as in the previous year.

### 5.6. Earnings per share

### i. Hyperinflation in Turkey

Due to the recognition of the Turkish economy as hyperinflationary, the Group has applied IAS 29 which requires the restatement of non-monetary assets to take into account the change in purchasing power based on the general price index and to be expressed in the measuring units current at the end of the reporting period. One of the non-monetary assets is goodwill recognized as at the date of obtaining control over our Turkish subsidiaries. Such goodwill was comes from the years 2010-2021.

The inflation-related revaluation of goodwill by the price index for 2023, translated at the exchange rate of 30 June 2023, amounted in total to PLN 10,067 thousand which was recognized in financial income, under 'Gain/Loss on the net monetary position', for the first half of 2023.

Input data were derived from the company's financial statements drawn up as at 30 June 2022. The input data were prepared in accordance with the ASEE Group's accounting policy.

As a result of the purchase price allocation, the Group recognized intangible assets constituted by enterprise document management software. The software valuation was made on the basis of expected future sales revenues, expected EBITDA margin and return on assets employed. The estimated cash flows were discounted with a discount rate equivalent to the weighted average cost of capital determined for the acquired company. In correspondence to the recognition of assets, the Group recognized deferred tax liabilities.

In the consolidated financial statements of ASEE Group, goodwill arising from the acquisition of Bithat Solutions s.r.l. was allocated to the Dedicated Solutions segment.

#### 6.5. Impairment tests

In line with the Group's policy, each year as at 31 December, the Management of the Parent Company performs an annual impairment test on cash-generating units or groups of cash-generating units to which goodwill or/and intangible assets with an indefinite period of useful life have been allocated. Whereas, as at each interim reporting date, the Management of the Parent Company only performs a review of the indications of possible impairment of cash-generating units to which goodwill and/or intangible assets with indefinite useful life have been allocated. In the event such indications are identified, the Management shall first verify the assumptions adopted in the last annual impairment test and, if necessary, carry out an impairment test for a given cash-generating unit or group of cash-generating units also the interim reporting date. The procedures followed in interim impairment testing are consistent with those applied for annual impairment tests performed as at 31 December.

Each impairment test requires making estimates of the recoverable amount of a cash-generating unit or a group of cash-generating units to which goodwill is allocated.

As at 30 June 2023, the Group verified its assumptions for the impairment test performed on goodwill as at 31 December 2022. In particular we checked whether the assumptions made in 2022 concerning the financial results to be achieved by individual cash-generating units were not materially different from their actual financial performance in the first half of 2023 and current forecasts for the full year 2023, and whether any internal or external factors did not cause a deterioration of our forecasts for the next financial years. The discount rate was verified by checking the weighted average cost of capital at the level of individual subsidiaries. If there were indications of impairment of investments in subsidiaries at the individual level, new tests were performed and the impact of WACC on these tests was analyzed, and the potential impact of those tests for impairment of goodwill was also analyzed at the group level.

The conducted analysis did not show any indications that would necessitate performing an impairment test on goodwill allocated to operating segments of the Group.

In line with the Group's policy, goodwill allocated to all of our operating segments will be tested for impairment as at 31 December 2023, even if there are no indications of impairment.

## VIII. Other explanatory notes

### 8.1. Off-balance-sheet liabilities

Within its commercial activities ASEE Group uses bank guarantees as well as contract performance guarantees as forms of securing its business transactions with miscellaneous organizations, companies and administration bodies.

As at 30 June 2023, the related contingent liabilities equalled PLN 73,472 thousand, while as at 31 December 2022 they amounted to PLN 74,612 thousand.

Assets serving as collateral for bank guarantee facilities:

Category of assets	Net value of assets		Amount of granted guarantee secured with assets	
	30 June 2023 PLN'000	31 December 2022 PLN'000	30 June 2023 PLN'000	31 December 2022 PLN'000
Financial assets	33	-	33	-
Trade receivables	-	-	-	-
Other receivables	974	379	803	379
<b>Total</b>	<b>1,007</b>	<b>379</b>	<b>836</b>	<b>379</b>

None of the above-described guarantee obligations meet the definition of a financial guarantee under IFRS 9, and therefore they are not recognized as liabilities in the statement of financial position of the Group as at 30 June 2023.

The Group is party to a number of contracts for rental of:

- offices and warehouses,
- locations for ATMs,
- transportation vehicles,
- office equipment,
- other assets.

As at 30 June 2023 and 31 December 2022, the above-mentioned contracts resulted in the following off-balance-sheet liabilities to make future payments:

	30 June 2023 PLN'000	31 December 2022 PLN'000
<b><i>Liabilities from rental of space</i></b>		
In the period up to 1 year	4,078	3,567
In the period from 1 to 5 years	2,550	3,356
Over 5 years	-	-
	<b>6,628</b>	<b>6,923</b>
<b><i>Liabilities from leases of equipment</i></b>		
In the period up to 1 year	201	469
In the period from 1 to 5 years	-	-
Over 5 years	-	-
	<b>201</b>	<b>469</b>

The said contracts meet the definition of a lease under IFRS 16. Off-balance-sheet liabilities disclosed as at 30 June 2023 are related to lease contracts that were subject to exemptions provided under IFRS 16 (short-term leases and leases of low-value assets).

### Disputes in litigation as at the end of the reporting period

During the reporting period, no significant proceedings were pending before any court, arbitration authority or public administration authority, concerning any liabilities or receivables of ASEE Group companies.

### 8.2. Seasonal and cyclical business

The Group's sales revenues are subject to some seasonality in individual quarters of the year. Such seasonality is observed mainly in the supply of hardware (the Payment Solutions and Dedicated Solutions segments), intelligent traffic management systems (the Dedicated Solutions segment), and the volume of transactions carried out within the MoneyGet ATM network (the Payment Solutions segment). The fourth quarter revenues

tend to be higher than in the remaining periods, as bulk of such turnover is generated from the sale of IT services for large enterprises and public administration. Such entities often decide to make higher purchases of hardware and licenses in the last months of a year.

### II. Basis for the preparation of financial statements

#### 2.1. Basis for preparation

These interim condensed financial statements have been prepared in accordance with the historical cost convention, except for financial assets carried at fair value through profit or loss or through other comprehensive income, financial assets carried at amortized cost, as well as financial liabilities carried at fair value through profit or loss.

These interim condensed financial statements do not include all information and disclosures required for annual financial statements and therefore they should be read together with the financial statements of ASEE S.A. for the year ended 31 December 2022 which were published on 22 February 2023.

These financial statements have been prepared on a going-concern basis, assuming the Company will continue its business activities over a period not shorter than 12 months from 30 June 2023. Till the date of approving these financial statements for publication, we have not observed any circumstances that would threaten the Company's ability to continue as a going concern.

#### Economic and political situation on the territory of Ukraine

On 24 February 2022, the Russian invasion of Ukraine caused a radical change in the geopolitical situation of the entire region in which the Company is located.

ASEE does not conduct any significant business operations in Russia, Belarus or in Ukraine. The Company does not hold any cash at bank accounts in Russia. As at the date of publication of these interim condensed financial statements, the existing situation does not have a significant impact on these financial statements.

The Company continues to analyze the geopolitical developments and their impact on the Company's financial position and financial performance in the future.

At the moment the situation is dynamic and therefore it is difficult to assess the long-term economic effects for our region and impact on the overall macroeconomic situation, which indirectly affects the financial results of our Company and Group.

## 2.2. Compliance statement

These interim condensed financial statements have been prepared in conformity with the requirements set forth in the International Accounting Standard 34 'Interim Financial Reporting' as endorsed by the European Union (IAS 34).

The scope of these interim condensed financial statements, being a part of the quarterly report, is in accordance with the Regulation of the Minister of Finance of 29 March 2018 regarding current and periodic information to be published by issuers of securities and conditions for recognizing as equivalent the information required by laws of non-EU member states (consolidated text: Journal of Laws of 2018, item 757) (the "Regulation"), and covers the semi-annual reporting period from 1 January to 30 June 2023 and the comparable period from 1 January to 30 June 2022 in case of the statement of profit and loss and the statement of cash flows, as well as the financial position data as at 30 June 2023 and the comparable data as at 31 December 2022 in case of the statement of financial position.

The cumulative data presented for the period of 6 months ended 30 June 2023 as well as for the comparable period have been reviewed by a certified auditor. Whereas, the quarterly data disclosed for the period from 1 April to 30 June 2023 and for the corresponding period of 2022 have not been subject to such a review. These data have been calculated as the difference between the semi-annual cumulative data and the data presented in the quarterly condensed consolidated financial statements of ASEE Group for the interim period ended 31 March 2023 which were published on 26 April 2023.

## 2.3. Functional currency and presentation currency

The presentation currency of these financial statements is the Polish zloty (PLN) and all figures are presented in thousands of PLN (PLN'000), unless stated otherwise. The Polish zloty is also the functional currency applied by Asseco South Eastern Europe S.A. Any inaccuracies in totals, amounting to PLN 1 thousand, are due to the adopted rounding of numbers.

Transactions denominated in currencies other than the Polish zloty are, at the time of initial recognition, translated into Polish zlotys using the exchange rate effective on the transaction date.

At the reporting date:

- monetary items denominated in a foreign currency are translated at the closing exchange rate, this is at the mid exchange rate of that currency as quoted by the National Bank of Poland on the reporting date;
- non-monetary items carried at historical cost denominated in a foreign currency are translated using the exchange rate effective on the transaction date;
- non-monetary items carried at fair value denominated in a foreign currency are translated using the exchange rate effective on the fair value measurement date.

For valuation purposes, we have adopted the following exchange rates of euro and US dollar (and analogically the exchange rates of other currencies as quoted by the National Bank of Poland):

- ✓ exchange rate effective on 30 June 2023: EUR 1 = PLN 4.4503
- ✓ exchange rate effective on 31 December 2022: EUR 1 = PLN 4.6889

## 2.4. Professional judgement and estimates

Preparation of financial statements in accordance with IFRS requires making estimates and assumptions which have an impact on the data disclosed in such financial statements. Although the adopted assumptions and estimates have been based on the Company's management best knowledge on the current activities and occurrences, the actual results may differ from those anticipated.

In the period of 6 months ended 30 June 2023, our approach to making estimates was not subject to any substantial modification in relation to the principles described in the financial statements for the year ended 31 December 2022.

### III. Information on operating segments

According to IFRS 8, an operating segment is a separable component of the Company's business for which separate financial information is available and regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance. The Company has identified the following reportable segments:

- The **Holding activities segment** includes revenues and expenses related to managing the Group. The segment's revenues comprise primarily dividend income as well as sales of business and technical support services to the Company's subsidiaries.
- The **IT services segment** includes revenues and expenses related to our information technology operations in two areas: authentication solutions (banking) and voice automation solutions (systems integration).

None of the Company's operating segments needed to be combined with another operating segment in order to be identified as a reportable segment.

The Company's financing activities as well as income taxes are monitored at the whole company level and therefore they are not allocated to individual operating segments. The Management also does not analyze assets and liabilities or cash flows in a breakdown by segments. The table below presents the key financial information reviewed by the chief operating decision maker in the Company.

### 5.5. Impairment testing of assets

#### Investments in subsidiaries – impairment tests

Each impairment test on investments in subsidiaries requires making estimates of the recoverable amount of a cash-generating unit or a group of cash-generating units constituted by individual subsidiaries.

At each reporting date, ASEE S.A. carries out a valuation of its assets concerning possible impairment. Should there be any indications of impairment, the Company shall estimate the recoverable amount of an investment. If the carrying value of an asset exceeds its recoverable amount, impairment charges are made in order to reduce such carrying value to the level of recoverable amount.

As at 30 June 2023, we estimated the recoverable amounts of our investments in the companies of ASEE Romania, ASEE Bulgaria, ASEE Kosovo, ASEE Macedonia, and BS Telecom because of a small excess of the recoverable amount over the carrying value of a given asset as at the end of the previous year and/or because their actual financial results were weaker than expected.

No indications of impairment have been observed in respect of our investments in other subsidiaries.

The recoverable amount of our investments in the above-mentioned subsidiaries as at 30 June 2023 was determined on the basis of their value in use, applying the forecasted free cash flow to firm (FCFF) based on financial forecasts approved by our management personnel. The detailed forecast covered the period of 5 years, while the residual value was determined assuming no real growth of the achieved margins after the forecast period.

The discount rate applied to determine the present value of expected future cash flows was equivalent to the estimated weighted average cost of capital for each individual company. Particular components of the discount rate were determined taking into account the market values of risk-free interest rates, the beta coefficient that was leveraged to reflect the market debt-equity structure, as well as the expected market yield.

During the period covered by the interim condensed financial statements, the Company re-estimated and determined the WACC used in impairment tests. Relative to the approach followed in the 2022 financial statements, the Company's Management has assessed the outlook for interest rates and inflation over the forecast and residual periods and reflected this accordingly in the tests performed.

The table below presents the basic assumptions concerning the discount rate and sales revenue growth as adopted in the testing model prepared as at 30 June 2023:

	Book value of investment	Discount rate applied in the model	Sales revenue growth rate
BS Telecom	66,114	14.9%-20.1%	13.6%
ASEE Bulgaria	4,265	10.8%	4.7%
ASEE Kosovo	33,561	13.9%-15.4%	7.4%
ASEE Macedonia	98,480	12%-15.2%	4.7%
ASEE Romania	97,919	12.2%-15.5%	4.9%

The sales revenue growth rate specified in the tables above was calculated as the compound annual growth rate (CAGR), this is an average annual growth rate over the analyzed period, assuming that each year-on-year increase is added to the next period's base.

In the case of all impairment tests performed as at 30 June 2023, the value in use of our investments was higher than their book value. The Company also carried out a sensitivity analysis in relation to the impairment tests performed for our investing activity assets.

### Analysis of sensitivity

Additionally, the Company carried out a sensitivity analysis in relation to the conducted impairment test. Such sensitivity analysis examined the impact of changes in:

- discount rate applied, and
- sales revenue growth rate

as factors with influence on the recoverable amount of a cash-generating unit, assuming other factors remain unchanged.

The objective of such a sensitivity analysis was to find the threshold values showing how much the selected parameters applied in the model could be changed so that the estimated value in use of each cash-generating unit was equal to its carrying value.

In the case of ASEE Romania, the investment's recoverable amount would have been equal to its carrying value if the discount rate applied in the model was increased by 0.46 pp with other assumptions remaining constant, or if the revenue growth rate was decreased by 0.21 pp with other assumptions remaining constant. As at 30 June 2023, the excess of the recoverable amount of this investment over its carrying value equalled PLN 4.1 million.

In the case of ASEE Macedonia, the investment's recoverable amount would have been equal to its carrying value if the discount rate applied in the model was increased by 0.17 pp with other assumptions remaining constant, or if the revenue growth rate was decreased by 0.12 pp with other assumptions remaining constant. As at 30 June 2023, the excess of the recoverable amount of this investment over its carrying value equalled PLN 1.7 million.

In the case of BS Telecom, the investment's recoverable amount would have been equal to its carrying value if the discount rate applied in the model was increased by 0.5 pp with other assumptions remaining constant, or if the revenue growth rate was decreased by 0.67 pp with other assumptions remaining constant. As at 30 June 2023, the excess of the recoverable amount of this investment over its carrying value equalled PLN 4.6 million.

Any reasonable modification of the key assumptions adopted in the valuation model of our investments in other subsidiaries should not indicate a necessity of recognizing any impairment charges.
