

ASEE Mobile Functionalities

Take your mobile app to the next level with our innovative features!

ASEE offers many mobile app functionalities that can be developed either:

- as a part of a new **standalone application**
- or integrated into an **existing one!**

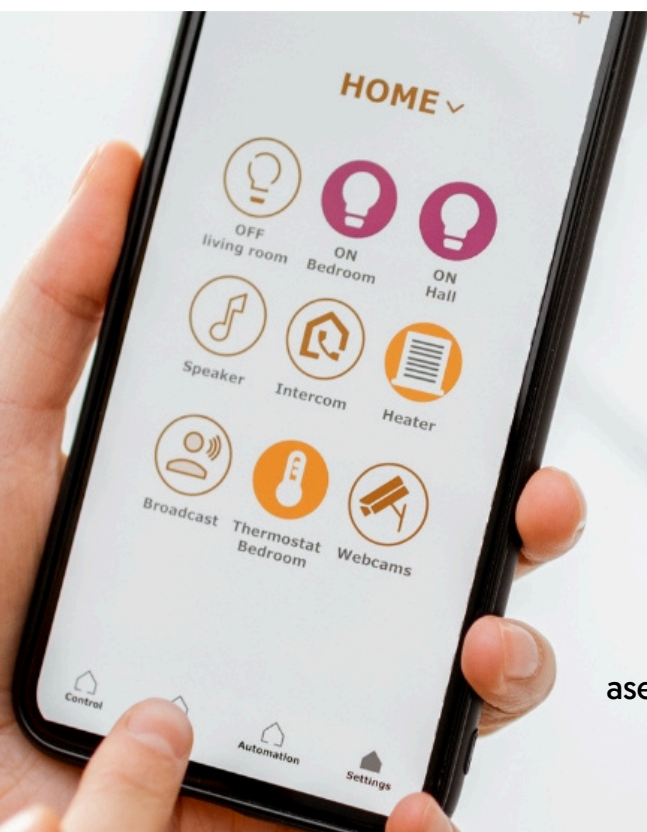

Based on our own experience in developing mobile applications

We offer a detailed list of functionalities that can be developed as a part of a new mobile banking application.

Our functionalities can also be added to an existing code [even the one ASEE didn't initially work on].

Over time we developed hundreds of functionalities in different domains

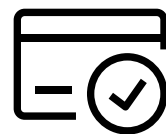

Activation & Login

Set up your mobile banking app easily and securely using various methods [PIN, fingerprint, FaceID].

Payments

Receive a range of convenient tools that will help you manage your user's financial transactions efficiently, such as standard payments, barcode scanning, P2P payments, and standing orders.

Insurance Management

From handling insurance products to managing policies and processing claims, our solutions empower you to navigate the complexities of the insurance world with ease.

Account Management

Manage your bank accounts efficiently and securely with features like account details, transaction list, limit management and many more.

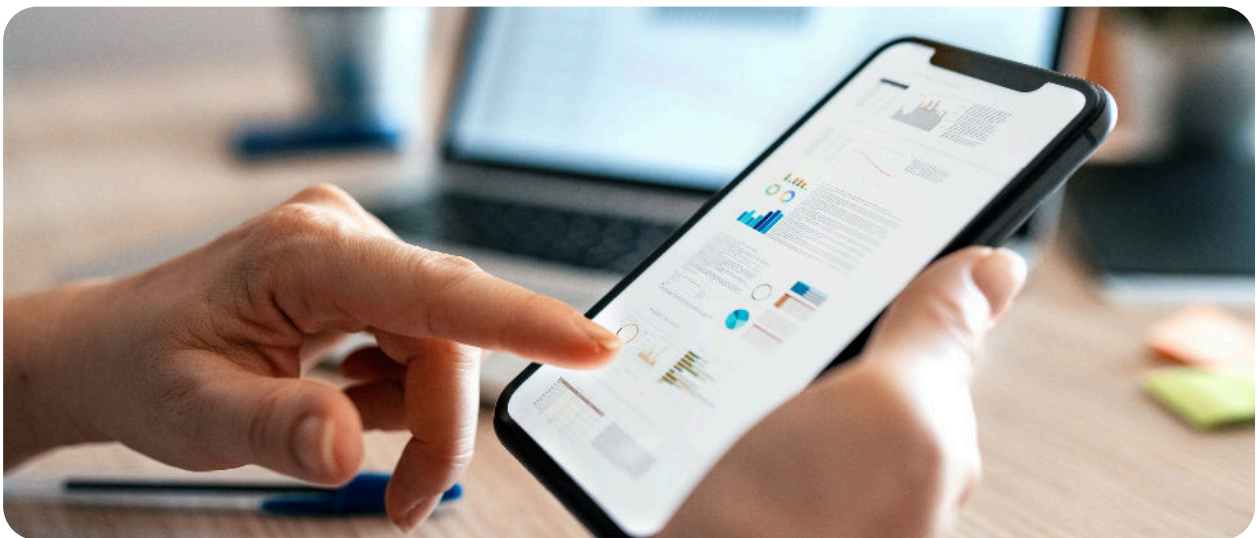

PSD2

We offer features introduced by European Union regulation to enhance security, promote innovation, and improve consumer protection in the financial industry: AIS, PIS, FCS, and Antifraud.

Social Security

Features related to managing and accessing Social Security benefits.

Card Management

Convenient tools to help you manage your debit, credit, and prepaid cards: activation, limit management, virtual cards, and many more.

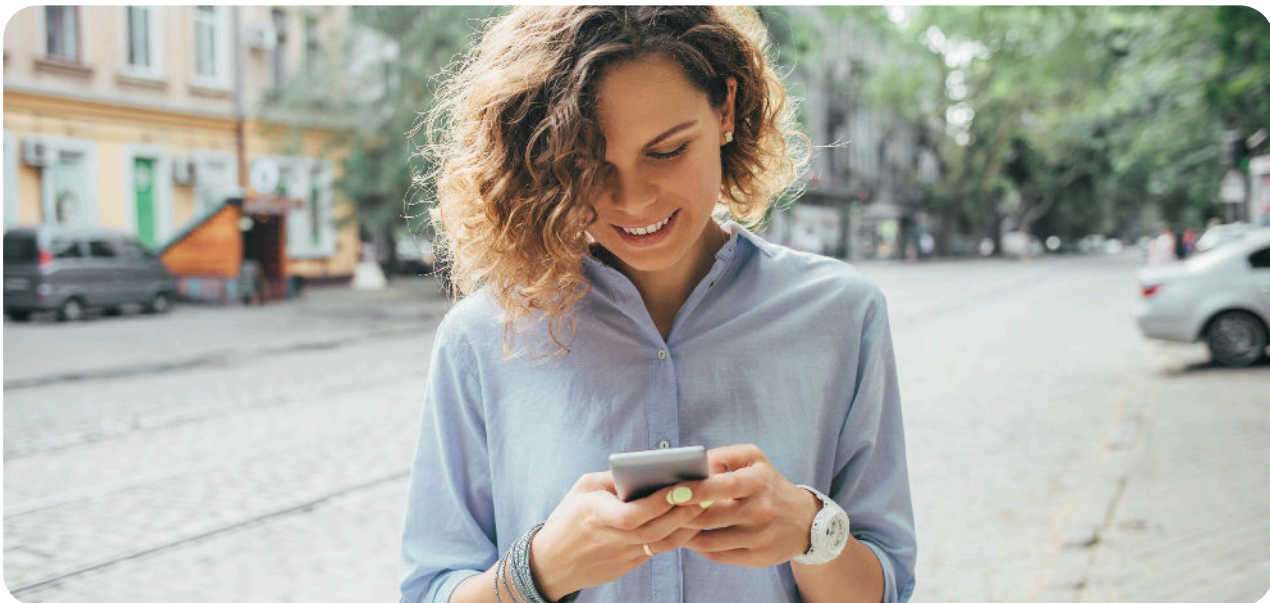

Consumer Credits

Features and services related to credit management, loan products, and credit-related transactions, e.g., overdraft, loan request, and loan simulation.

Mortgage management

Features and services related to mortgage loans like installment payment, installment suspension, and plan variation.

Settings & More

Features and tools that allow you to customize your banking experience and access additional services like exchange rates, geolocation, and biometrics settings.

Documents Exchange

Features designed to facilitate the secure exchange of documents between users and the bank.

PFM

Manage your finances effectively with a set of functionalities in mobile banking, such as budget management, expenditure comparison, and estimated future spending.

Notifications

Receive timely alerts and notifications regarding your account activity, transactions, and promotional offers.

Assistance

Get support, guidance, and assistance throughout the mobile app with functionalities such as tutorials, chat & virtual branch.

Lifestyle

Enhance your users' daily lives, promote well-being, and facilitate convenient and enjoyable experiences with a wide range of features, such as ESG offers, parking payments, travel booking, and more.

Personal Data & Authentication

Securely manage users' personal information and facilitate authentication processes, such as personal ID management, electronic signatures, and digital certificates.

Commercial Engagement

Provide users with targeted commercial offers and promotions within the mobile banking app.

Trading & Investment

Empower users to manage their investment portfolios, trade stocks, bonds, funds, and other financial instruments, and stay informed about market trends and opportunities.

Our comprehensive list of functionalities is widely used by banks and large corporations!
